A brief overview

After qualifying from a two year sound engineering course I have been working as a successful sound engineer from 2001. In that time I have gained a considerable amount of experience working freelance for various PA and production companies as well as working directly for artists.

I take pride in being hard working, dependable and focussed to meet the demands of live events.

Technical Experience

I have considerable experience in setting up and / or operating PA's and monitor / IEM systems in small venue's to arena's, from one off shows to production tours. I'm proficient with most industry standard digital and analogue consoles, outboard and system processors, as well as radio frequency coordination and deployment.

An example of corporate events and corporate clients

Booker Prize for excellence, Reebok, Virgin, Ministry of Defence, Astra Zeneca
Audiotech - Fix8 - Audio Alliance - Evans Audio Visual - Corporate Events

An example of production's worked on and companies worked for as touring or in house tech
